

GLORY®

CP-11

Coin Counter/Packager

Functional simplicity for convenient
coin handling!

More compact, easier to use, with an innovative sleek design for customer appeal

Glory's CP series coin handling machines are best sellers, widely used in banks, retail stores and amusement facilities. The new CP-11 upgrades the superior handling capability of the entire CP series with its more compact body, beautiful style and functional simplicity.

Counting and bagging to the last coin

Despite its compact size, the CP-11's wide hopper holds 2,000 coins and counts, 1,800 coins per minute. It automatically rejects unspecified coin denominations during the counting process. The CP-11's new feeding system reduces the human factor by automatically counting and bagging with exceptional speed.

Speedy batch handling

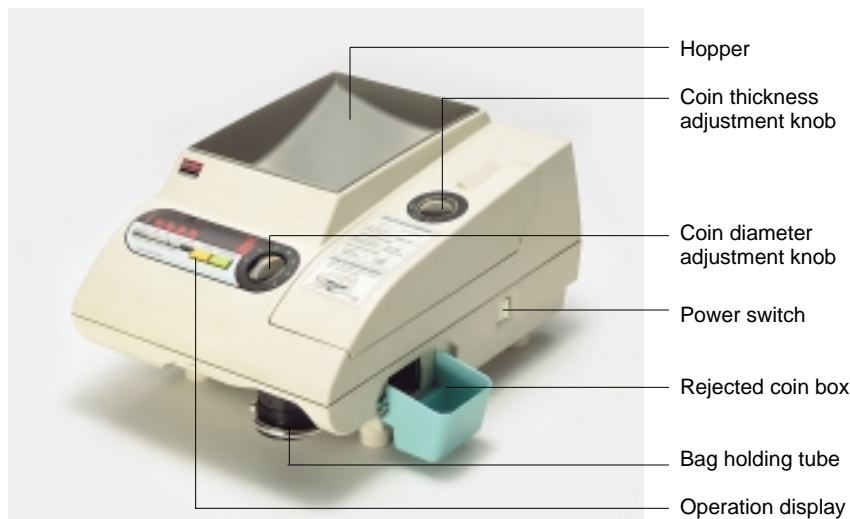

One touch sets the batch number of coins for 8 denominations from 50 to 5,000 coins. And batch handling for an optional number of coins from 5 to 9,999 is easier than ever.

Simple operation with easy to read data

Operation is simple with the concentration of controls and LED display on the front panel. The operator can specify both denomination and batch numbers, while the display indicates the number of counted coins (5 digits) and the batch number (4 digits). The functional design enhances ease of operation and reading, along with overall efficiency.

Compact design facilitates location

The compact size, 300(W) x 400(D) mm, efficiently uses space. Glory's sense of design has generated a sleek new model for today's comfortable office space.

Specifications

Counting speed:	1,800 coins/min.
Hopper capacity:	2,000 coins
Acceptable coins:	8 denominations
	Diameter: 15—35 mm (0.59—1.38")
	Thickness: 1.0—3.2 mm (0.04—0.13")
Power supply:	AC 120/220/240V ± 10%, 50/60 Hz
Power consumption:	65W/120V, 73W/220V, 90W/240V
Dimensions: (W x D x H)	300 x 400 x 222mm (11.8" x 15.7" x 8.7")
Weight:	15.5 Kg (34.2 lbs.)
