

[BOOST THE PERFORMANCE OF PAYCLOCK!]

UPGRADE TO PAYCLOCK PRO-V4

Get the power you need with **PayClock PRO-V4**

Multi-user standard – PRO-V4 allows 3 concurrent users, and can be expanded to support up to 24 as your company grows.

Local area network compatible – Software can now be installed on a server and accessed from other workstations.

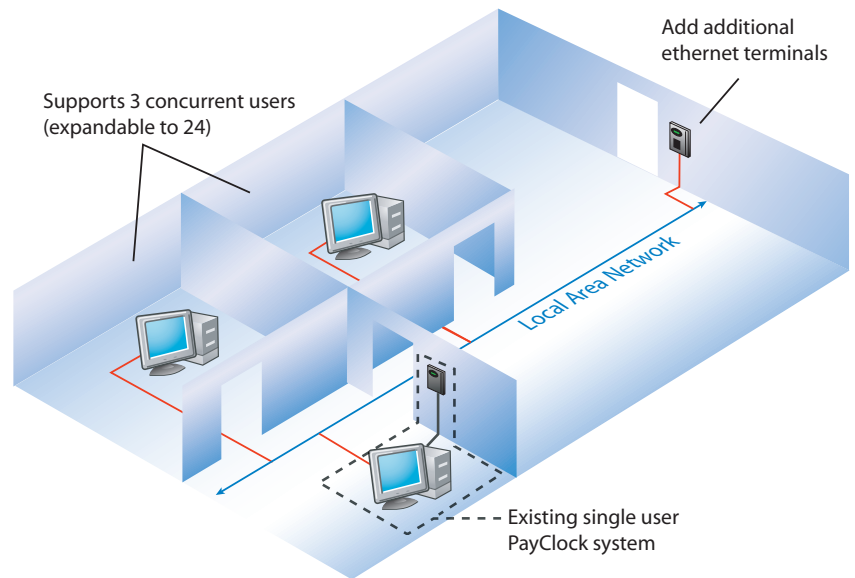

Support for multiple terminals – Now add additional PC100s or PC400s to place terminals closer to work places and facility entrances.

Rotating Schedules – Powerful adjustable work schedules with adjustable in/out grace settings.

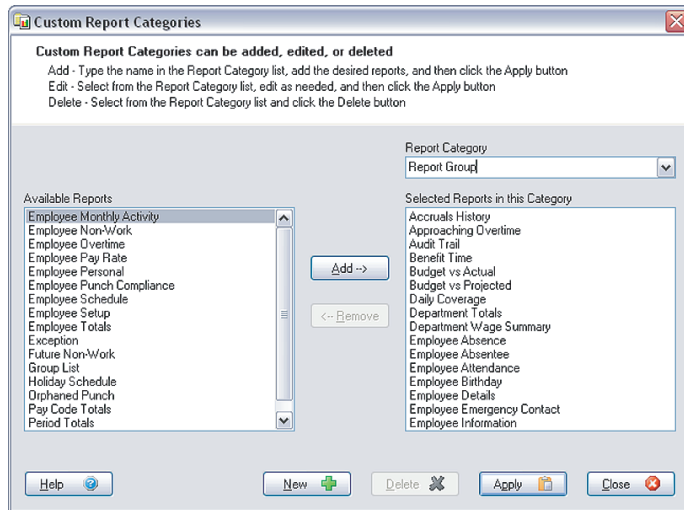

Employee Groups – Different work rules and overtime calculations for different groups of employees. Up to 10 pay classes with PRO-V4 versus one with EZ. Also allows for multiple pay frequencies including weekly, bi-weekly, semi-monthly and monthly in the same system.

Sophisticated Pay Rules – Consecutive day overtime, shift differentials, premium time, and more. Adds 85 custom pay codes to the 7 standard pay codes found in PayClock EZ.

Expand PayClock across your network

Expanded report library

Expanded Report Library – With over 40 standard reports, PayClock PRO-V4 adds valuable information to aid in labor decision making. Compared to the 17 standard reports in PayClock EZ, PRO-V4 clearly helps improve your organization and control important payroll related costs.
